## International WCRP/IOC Conference

# Regional Sea Level Changes and Coastal Impacts

July 10-14, 2017

THE EARTH INSTITUTE  
COLUMBIA UNIVERSITY

New York, NY, USA

Sea level change is already impacting coastal communities globally and will continue to do so.

To meet urgent societal needs for useful information on sea level, the World Climate Research Program (WCRP) has established the theme “Regional Sea-Level Change and Coastal Impacts”, as one of its cross-cutting “Grand Challenge” (GC) science questions.

The GC Sea Level has designed and developed an integrated interdisciplinary program on sea level research reaching from the global to the regional and coastal scales.

In particular, the program aims for close interaction with relevant coastal stakeholders to make sure that the results effectively support impact and adaptation efforts and wider coastal zone development and management.

The WCRP, jointly with the Intergovernmental Oceanographic Commission of UNESCO (IOC), is organizing an international conference on sea level research that will address the existing challenges in describing and predicting regional sea level changes, and in quantifying the intrinsic uncertainties.

It follows 11 years after the first WCRP sea level conference (Paris, 2006), and three years after the last Assessment Report of the Intergovernmental Panel on Climate Change (IPCC). It will provide a comprehensive summary of the state of worldwide climate-related large scale sea level research.

Science organizing committee

Co-Chairs

Robert Nicholls  
Detlef Stammer  
Roderik van de Wal

Members

Thorkild Aarup  
Jérôme Benveniste  
Anny Cazenave  
John Church  
Gonéri Le Cozannet  
Catia Domingues  
Natalya Gomez  
Jonathan Gregory  
Jochen Hinkel  
David Holland

Co-Chair

Peter Schlosser

Members

Gregory Fienhold  
Jennifer Genrich  
Mike Patterson  
Maureen Raymo  
Jill Reisdorf  
Cynthia Rosenzweig  
Detlef Stammer  
Pamela Vreeland

The conference is a 5-day event with a leading theme guiding the activities of each day. The structure of the conference will consist of plenary sessions followed by extensive poster sessions. In the evenings we are planning to hold ,think-tanks‘ focusing on new science frontiers and activities.

Conference schedule

Time	Monday	Tuesday	Wednesday	Thursday	Friday
8 - 9 am	Registration				
9 - 11 am	Opening Session	Paleo & Cryosphere	Coastal Zone	Contemporary Sea Level Change	Projections
11 - 12.30 pm					Closing Session
12.30 - 2 pm	Lunch	Lunch	Lunch	Lunch	
2 - 4 pm	Paleo & Cryosphere	Contemporary Sea Level Change	Coastal Zone	Projections	Optional Field Trip
4 - 6 pm					
6 - 9 pm	Reception		Public and Outreach Event	Conference Dinner	

Conference outcome

The conference will serve as a basis for a new assessment of the state-of-the-art on regional sea level research that will be an important input to the next IPCC assessment.

A major outcome from the conference will therefore be an evaluationof the current state of sea level science, an outline of future research requirements for improving our understanding of sea level rise and variability and a description of the observational requirements (both experimental and sustained systematic observations).

The outcomes will be published in multiple forms, including an agenda setting peer-reviewed paper specifying the information on coastal seal level change required by coastal communities for adaptation and decision making purposes.

In detail the conference will:

I. Identify the key factors contributing to past, present and future regional sea level rise and variability.

II. Organize a systematic attack on the error budget of these factors.

III. Identify stakeholder needs for sea-level information for coastal planning and management purposes.

IV. Define the requirements for new and augmented research, technical development and observations consistent with the above.
